Your School Essentials for 2026-27

Sustainability at STAEDTLER

Our aim is to handle the resources of our earth with care and foresight. This is why efficiency plays a major role in our philosophy for sustainable action, for example in the production or logistics of our products. Our focus is on our manufacturing processes, the materials used, such as plastic and wood, as well as the procurement and transport of raw materials.

Here are just some of our initiatives and goals that we undertake to **reduce, reuse and recycle**.

Quality that lasts

Sustainability begins with quality products that last, and this is the objective we use to drive our entire production chain: from extracting the right raw materials (break-resistant leads), to product development innovations and using energy-efficient packaging (space efficient, reusable).

Innovative features such as **Dry Safe Ink** (leaving the cap off for days without drying out) or having **refillable markers** ensures the long life of our products. Our **STAEDTLER boxes** are designed to be used again and again ... all they need is some favourite STAEDTLER products to fill them up!

Production and process innovations

Upcycled wood

We have developed a production process that makes use of the smallest wood by-products from the wood industry, to produce upcycled high quality pencils. These new Upcycled Wood products have been recently awarded the TÜV Rheinland Green Product certification.

100% Green Energy

All four German production sites have been manufacturing using 100% green electricity since 2021. STAEDTLER has committed to using renewable energy by 2030.

Made in Germany

Almost two thirds of our STAEDTLER products are manufactured in Germany giving added peace of mind for high efficiency and quality standards.

Products made from recycled materials

By 2025, we're aiming to have a number of pen and marker products in our range with the barrels made from 97% recycled materials. This includes Lumocolor markers and Textsurfer highlighters, amongst others, and this changeover has begun in 2022.

Only using wood from sustainable sources

Wood is the very heart of all our pencils and is therefore essential for STAEDTLER. We only use wood from sustainable forestry for the production of all wood-cased pencils. All the wood used is either PEFC or FSC™ certified.

The STAEDTLER plantation

Trees for future STAEDTLER pencils will grow in our own FSC certified plantation (FSC C172764) in Ecuador, South America, on an area of around 1,200 hectares.

PENS & MECHANICAL PENCILS

Noris® writing pen

Designed specifically for children, as they make the transition from pencil writing to pen, the Noris writing pen is the perfect tool. The housing cap and end are made from 97% recycled material and the pressure resistant tip protects from push back during additional pressure being applied to the pen while in use. The DRY-SAFE technology means the cap can be left off for days. Water based ink so can easily wash out of most textiles.
