Graphite pencils

No such thing as grey and drab. That's because the level of detail in pencil drawings can be surprisingly realistic, be it as a stand-alone piece of art, a draft sketch, a prep-sketch for watercolour painting, or as a precise accent in an image.

STAEDTLER provides the perfect tool for each one of these techniques. Pencils with a high carbon content, water-soluble or permanent, in medium or hard degrees, metallic glossy or for drawing on unusual materials.
