

# colour wheel

## Art Activity!

### What you'll need:

Staedtler coloured pencils

Staedtler triplus fineliners

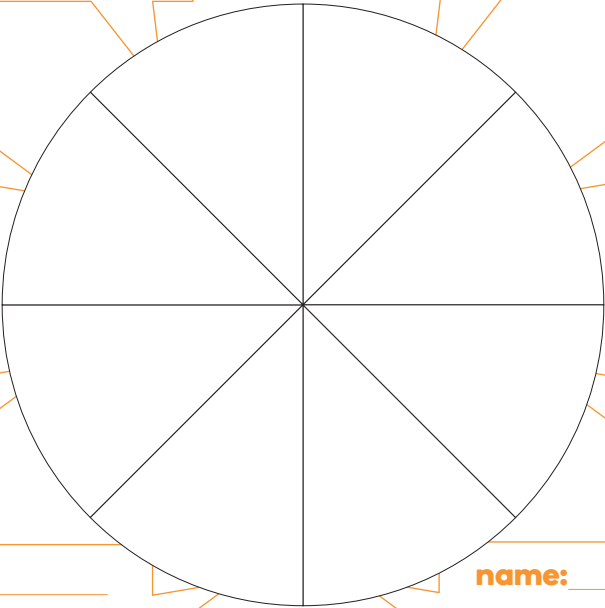

### Instructions:

1. Using the supplied worksheet, fill out the colour wheel using your chosen colours and where possible placing them in colour order of the rainbow.
2. Label the colours by name and colour type (Primary, Secondary and Tertiary).
3. Colours have expressive qualities, pick 5 different colours from your wheel and create 5 drawings (using one of the chosen colours for each). Think outside the box and visually present these expressive qualities by drawing or sketching with the colour. *For example: green forest to signify peace and growth.*
4. Once you have drawn your 5 emotive drawings, research independently colour psychology and write down what colour surprised you most.
5. Discuss with the class what colour you chose and why its psychology surprised you.
