

# Noris digital classic:

## The perfect digital pencil – convenient, easy and reliable.

This slim classic – made in Germany – is ideal for writing and drawing on tablets, smartphones and notebooks: with the STAEDTLER Noris digital classic, writing directly onto digital devices by hand becomes a real experience.

### Tradition meets innovation

The look and feel of the stylus are based on the classic, yellow and black striped Noris pencil from STAEDTLER.

With its **hexagonal shape** and **soft, non-slip surface**, the Noris digital classic lies comfortably in the hand. This promotes a natural writing position – just like a normal pencil.

Classic hexagonal shape

No charging, no pairing

### Independent

**Anywhere, anytime:** the innovative Noris digital classic works without a battery and so **never needs to be charged**. In addition, it does not need to be paired with the device or require a driver to be installed.

### Clever

The stylus comes with an **innovative Wacom lead** and operates on the basis of **EMR technology** (electromagnetic resonance). Thanks to palm rejection, **the hand can rest ergonomically on the device** while writing and drawing.

Innovative Wacom lead

Soft, non-slip surface

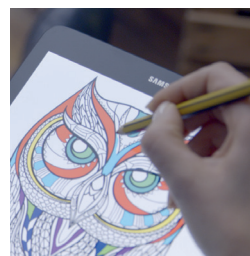

### Innovative material

The barrel with its **soft, non-slip surface** is made from the innovative wood-based material **WOPEX**. The wood content comes from **PEFC-certified** German forests.

Precise 0.7 mm point

Compatible with EMR technology

### Reliable & creative

Thanks to the **precise, replaceable 0.7 mm point** and the **flexible writing angles** between 40 and 140 degrees, writing and drawing on the display becomes a real experience.

Thanks to the **4,096 pressure levels**, the line width of a stroke can be **intuitively varied** – just like with a pencil.

### More information & models
