FIMO® Brand Shop	70–74
------------------	-------

With **FIMO® kids** (p. 15 ff.) easy modelling is guaranteed! It is **particularly smooth, easy to shape** and available in a wide variety of bright colours. This modelling clay lets the young artists run free with their imagination and create their own toys.

With **FIMO® soft** (p. 25 ff.) you can turn your ideas into reality. The modelling clay is ready to use and easy to blend – **ideal for beginners and hobby artists**. Easily workable, it has **30 brilliant colours** for you to work with!

FIMO® effect (p. 32 ff.) gives your artwork that certain something: your creation will **shine, shimmer and sparkle**. Available in a **variety of different shades and effects** like nightglow or glitter, this opens up a whole world of stunning options.

FIMO® liquid (p. 42 f.) is an oven-hardening gel, suitable for **beginners as well as for more advanced users**. It has a thick and fluid consistency. After hardening, it is extremely flexible. FIMO liquid comes with a practical dosage tip for **pinpoint application and clean handling**. It is compatible with FIMO soft, FIMO effect and FIMO professional.

FIMO® professional (p. 52 ff.) is the clay for meeting the highest requirements of professionals, artists and advanced clay users. Its firm consistency allows detailed working and guarantees very high dimensional stability. FIMO professional is compatible with FIMO soft and FIMO effect. With 28 brilliant colours, including 5 True Colours made with the purest pigments and our precision mixing system, you can create accurate and vibrant colour blends.

FIMO® air (p. 58 ff.) is particularly easy to work with because it is not fired in an oven – **it air dries**. Even after that, you can continue to process your creation by **sanding, drilling, filing, painting or polishing** it.

FIMO® tools (p. 45 ff.) help you take your creations to the next level: with these you can easily embellish your artworks, create **unique details** as well as original **patterns and designs**. We offer you modelling tools and acrylic rollers, moulds and varnishes as well as a large selection of decorative items.

Tips & Tricks

for working with FIMO® (oven-hardening)

Scan and discover

[www.staedtler.com/
fimo-tutorial](http://www.staedtler.com/fimo-tutorial)

The right working surface

You can use a range of working surfaces for FIMO: **tiles**, **glass sheets** or **backing paper**. These surfaces ensure that no unwanted patterns are created on the FIMO as you work. They are also particularly easy to remove the modelling clay from.

Keeping hands and work surfaces clean

It is best to clean your hands and work surfaces with a **damp cloth**. This is gentle on the skin (particularly if you have been doing a lot of work with FIMO) and removes dust and dirt, to prevent them from being transferred to the modelling clay.

The best way to store FIMO®

If you have FIMO left over after crafting, it can be stored and **reused**. Oven-hardening FIMO must be stored in a **dust free** but **not airtight** environment. Storage should also protect against heat and sun. We recommend you store FIMO in a **cool, dry place** in **cling film** or **plastic bags**, avoiding contact with polystyrene, PVC or styrofoam.

Creating accents with structured surfaces

Using **texture sheets** or **simple everyday objects** like a sponge, a lace doily or a leaf, great patterns can be created onto the modelled sheet. Just lay it on, press gently and carefully pull it off.

Marbling

By **twisting and kneading** different colours together, great marble effects can be created. The classic modern trend can be applied to FIMO models easily and create a very special look.

Mix colours

By **mixing FIMO colours together**, new and individual colours can be created. The FIMO blocks are divided into 8 portions, which makes the mixing of individual colours very easy.

Colour gradients

Colour gradients can also be made very easily by using different coloured FIMO clays. This effect gives the creations **depth and a special look**. Whether striking or subtle – the gradients can be designed individually.

Embellishing

With leaf metal, gloss or matt varnishes (p. 48 f.) you can easily achieve stunning effects. After hardening your creation in the oven simply apply some size for leaf metal with a brush and carefully press the leaf metal onto the FIMO. Afterwards seal it with gloss varnish. Using **light and gloss effects** to create **shimmering accents** makes your FIMO creation an eye-catcher.

 [@fimostaedtler](https://www.instagram.com/fimostaedtler)

1. Cut off 4 portions from a block of FIMO kids „glitter red“ clay. Roll it into a ball for the body.

5. Shape a small nose and press it onto the head. Use a cocktail stick to make holes for eyes. Use a piece of drinking straw cut in half to make a mouth.

2. Shape 1½ portions of Black into a ball for the head.

6. Roll tiny pieces of FIMO into balls for the spots. Flatten them slightly then press onto the body. Make 9 (or 7) spots.

Bake FIMO in a pre-heated oven at 110 °C for 30 minutes. Cool before handling.

3. Press the head onto the body, keeping both pieces rounded and even.

4. Divide a ¼ portion into 2 pieces then shape into 2 cm antennae. Make 2 holes in the head with the end of a small brush. Press the antennae into the holes.

MATERIALS

- 1 block FIMO kids „glitter red“ 8030-212
- 1 block FIMO kids „black“ 8030-9
- A tile, modelling tools, cocktailstick, small paintbrush, wet wipes, ruler, scissors, straw

Made for creative bloomers!

>>Upcycling DIY flower pot<<

1.

Roll half a block each of FIMO soft in "white", "pale pink" and "sahara" into long cords (approx. 30 cm long).

2.

Make your rainbow by shaping the white FIMO cord into a "U". Position the FIMO soft "sahara" cord underneath it, followed by the cord in "flesh light" and "white". Cut off the surplus ends at the bottom edges of the rainbow using the blade.

3.

Create several rainbows like this and place them directly on the terracotta pot. It also looks pretty if you add little dots of FIMO in between.

4.

Roll some FIMO soft "white" into a long cord. Cut off two pieces and form them each into a shallow "U" shape.

5.

Now add several smaller pieces of the FIMO cord and press down.

6.

Roll some FIMO soft "sahara" into a long cord. Print out the template and shade over the reverse side of the paper with a soft pencil.

7.

Now go over the lines with an HB pencil to transfer the design to your flower pot.

8.

Position the FIMO cords on the lines you have traced and press down. Now harden all your terracotta pots with FIMO decorations for 30 minutes in a preheated oven at 110 °C / 230 °F on upper and lower heat.

Tip: If the FIMO won't stick to the terracotta pot after hardening, simply attach your design using superglue.

>> Shell earrings in trend colours <<

Our new trend colours evoke the desire for summer, sun, and sea! We'll show you how to create beautiful jewellery pieces with lovely cutters and elegant earrings. The shell shape will soon dangle from your ears, enhancing your trip to the sea. Perhaps you can already hear the sound of the surf?

Find the full tutorial here:

 www.fimo.com  [@fimostaedtler](https://www.instagram.com/fimostaedtler)

FIMO® kids

FIMO® soft | effect

1. Roll out half of the FIMO soft block in the trend colour "ocean wave". Use spacers (approx. 3 mm) to achieve an evenly thick sheet. Take the cutter and press it into the FIMO. For some cutters, it might be helpful to dip them in cornstarch or powder beforehand to prevent sticking.

2. Many cutters have a cutting outer edge and embossing shapes inside, so it's important that the sheet is thick enough. Gently remove the shell shapes from the surrounding FIMO.

3. To mount the metal ear studs, use the pearl piercing needle to create holes.

4. You can add a textured surface to parts of your shell shapes. Press coarse-grained sandpaper gently onto the FIMO and lift it off.

5. Place all elements in the oven at 110 °C for 30 minutes. Let them cool afterward.

6. Bend the metal rings using pliers and thread the earrings and shell shapes onto the ring. Then close it again.

>> FIMO® effect botanical colours „loop earrings“<<

With the new FIMO botanical colours and its fine plant parts, you can create wonderfully natural-looking pieces of jewellery. Get started right away and in an hour you will have beautiful earrings dangling from your ears!

1. Take half of the FIMO botanical half-block and roll it into a string. Then use the blade to divide it into three equal parts. Roll out the string further. To achieve an even thickness, stick spacer (e.g. wooden sticks) under a glass plate and use them to roll out the cords.

3. You can place two ovenproof supports under the hangers to stabilise them. Place all the elements in the oven at 110 °C for 30 minutes. Leave them to cool down afterwards. To be able to connect your moulds to the earrings after hardening, you need to drill small holes in them with the hand drill

2. Lay the three cords together and press them together evenly. You will need two pieces of 8 cm each for the earrings. Cut them off using the blades. Lay the two ends of the ribbon on top of each other to create a drop shape inside the loop. Let the ends protrude slightly and bend them backwards.

4. Use pliers to blend the metal earrings open and push them through the hole. Then close them again. Your earrings will be particularly shiny if you coat them with gloss varnish. Allow the coat to dry thoroughly afterwards.

MATERIALS

- FIMO effect botanical colour of your choice
- FIMO blade set 8700 04
- FIMO gloss varnish 8703 01 BK
- Oven thermometer
- Earrings
- Spacer (e.g. wooden sticks)

FIMO® air

FIMO® LIQUID UND FIMO® MIX QUICK

Product information

FIMO® liquid

- Oven-hardening liquid gel
- Especially for beginners, hobby artists and professionals
- Thick, fluid consistency
- 4 different colours:
 - **Translucent** – especially clear and translucent
 - **Metallic gold and silver** – with shimmering pearlescent effect
 - **Black** – well covering colour brilliance
- Extremely flexible after hardening
- Ideal complement for FIMO modelling clay: compatible with FIMO soft, FIMO effect and FIMO professional

- Practical dosage tip for pinpoint application and clean handling
- Can be used in bakeable silicone moulds
- Resealable plastic bottle
- To embellish FIMO clays as well as a bond of hardened with non-hardened FIMO items
- Ideal for contouring and grouting techniques
- Image transfer from prints, graphite and pencil drawings
- Glaze effects: pure or dyed with FIMO modelling clay
- Mixing techniques: e.g. marbling and colour gradients
- Detailed instruction can be scanned via QR code

FIMO® mix quick:

- Clay softener
- Extra soft material for kneading into firm FIMO
- For an easier and faster softening of firm FIMO

CREATIVE ACCESSORIES

Suitable for FIMO®
and FIMO® air!

Product information

- Tools and appliances designed specifically for the use with FIMO
- Multiplies the possibilities for the perfect finish
- Safe handling, accurate results

Oven thermometer:

- With red silicone cover – heat protection for hands
- Easy-to-read dial
- Hook for hanging in oven
- Range 0 - 300 °C, temperature tolerance +/- 2 %

Shaped cutters:

- 6 different metal mini shaped cutters

Grind'n polish set:

- Sanding sponges for dry and wet sanding and smoothing of hardened FIMO surfaces
- 3 different grades (fine, superfine, microfine)
- For round and curved surfaces
- Easy to wash out, reusable

Modelling tools:

- Sets with 4 different plastic modelling sticks

Acrylic roller:

- For evenly rolling out FIMO
- For a particularly smooth surface

Blade sets:

- High-quality blades for clean-cut edges
- Precise cutting results
- Made of stainless steel
- Rubber grip for preventing injury

FIMO®

STAMP KIT 8700 09

- Ideal for beginners and hobby artists
- Easy individualization of FIMO and FIMOair
- A selection of 88 characters offers a variety of compilation options
- The 88 characters include: 49 letters from A to Z; 19 numbers from 0-9; 20 special characters
- Letter height: approx. 5 mm
- Plastic holder approx. 10 cm in the well-known FIMO red for precise stamping
min. order quantity: 5

FIMO® PROFESSIONAL – THE CLAY FOR THE HIGHEST OF DEMANDS

FIMO® professional
**STANDARD BLOCK
8040-..**

57 g, 55 x 55 x 24 mm,
segmented into 8 portions,
24 brilliant colours,
min. order quantity: 6

Product information

- High-quality premium modelling clay for advanced users, artists and professionals
- Firm consistency and very high dimensional stability for particularly delicate work and special techniques such as Caning, Mokume Gane and Bargello
- Exceptional fracture resistance and solid flexibility (thin parts) after hardening
- Reliable high-quality standards for high demands
- Careful selection of pigments based on type, purity and concentration
- 28 brilliant colours, incl. 5 True colours
- Coordinated colours from the classic colour wheel enable an unbelievable spectrum of colour nuances through simple mixing
- Defined neutral colours perfectly complement the FIMO professional colour range and are ideal for lightening, darkening or toning colours accordingly
- Practical division into 8 portions for easy blending
- Compatible with FIMO soft and FIMO effect

- Standard block, 57 g (2 oz)
- Easy to open
- Infinitely versatile: For jewellery, accessories and home decor
- Different colour packs

Colour display:

- Comprising 6 feed trays
- Showcase for presenting finished sample "flower"
- Intelligent, modular snap-in design
- 24 FIMO professional colours

Air-drying modelling clays
no bake. **JUST MAKE.**

Tips & Tricks

for working with FIMO® air (air-drying)

[www.staedtler.com/
FIMOair](http://www.staedtler.com/FIMOair)

Scan and discover

The right working surface

A wide variety of surfaces are suitable as a working surface. These include **tiles, smooth wooden boards, silicone mats or baking paper**. However, you should not work with FIMOair on glass surfaces – the modelling clay can stick to them.

The right tools

For the FIMOair project to be a complete success, the right basic equipment is essential: **a rolling pin for rolling out, sponges, brushes, modelling tools, a blade or knife** and a small **bowl** of water are essential.

Drying

The time it takes for the FIMOair to harden depends on the **wall thickness, size, room temperature and humidity** and can take several days. If possible, the work of art should dry slowly at **cooler temperatures** – this ensures greater resistance to cracking and deformation. It is important not to use a hairdryer, as models can deform or crack. To ensure that the modelled object dries evenly, it should be turned over during the drying process.

The optimal storage of FIMO®air

Small leftovers can be stored in an **airtight container such as a screw-top jar** with a few drops of water. The same applies to packages that have already been opened - these should also be stored in an airtight container at **room temperature** and conditioned with **a few drops of water** - especially if the mixture is to be stored for a longer period of time. If the FIMOair leftovers are no longer needed, they can simply be disposed of with residual waste.

Creating accents with structured surfaces

Using **texture sheets or simple everyday objects** like a sponge, a lace doily or a leaf, great patterns can be created onto the modelled sheet. Just lay it on, press gently and carefully pull it off.

Embellishing

With leaf metal, gloss or matt varnishes you can easily achieve stunning effects. After hardening your creation in the oven simply apply some size for leaf metal with a brush and carefully press the leaf metal onto the FIMOair. Afterwards seal it with gloss varnish. Using **light and gloss effects** to create **shimmering accents** makes your FIMOair creation an eye-catcher.

CLAYLIKE

You enjoy modelling with clay, but the effort is too much for you?
FIMOair with its clay-like texture is perfect for producing all kinds of objects.

SAND

The edges of your creation are a little bit humpy?
Then just sand them and make them soft and smooth.

SAW

You need to adapt your creation?
That's okay. You can use a saw for modelling clay for example to remove unwanted parts.

AIR-DRYING

No bake – just make. Is it really that easy?
Yes! No kiln or oven is needed for producing all kinds of objects – it dries in the air!

CARVE, DRILL, FILE

You want to hang up your project?
No problem – just drill some holes.

PAINT & VARNISH

Just white is not exciting enough?
Grab some acrylic paints or even permanent marker and add to your pieces your own personal touch.

Not shiny enough?
No need to worry – put some varnish on top and your project will shine and shimmer.

>>DIY bowl made of air-drying FIMO® air<<

These self-made bowls made of FIMOair are perfect for all small items such as jewellery, cosmetics, keys or paper clips.

With that the chaos and searching has finally come to an end!

Find the full tutorial here:

www.fimo.com [@fimostaedtler](https://www.instagram.com/fimostaedtler)

Level crafting time

easy

ca. 20 min

1. Roll out a block of FIMOair in white with the acrylic roller to form an approx. 6mm thick sheet on a piece of baking paper. Take a round cookie cutter with the size of your choice (e.g. 10cm) and cut out the basic shape of your bowl.

Tip: In order to achieve an even thickness, you can put a pencil next to the mass to be rolled out and roll over it with the acrylic roller. These „spacers“ ensure that your plate is evenly thick.

2. Place the cut-out circle on your porcelain or glass bowl, press it gently so that it hugs the bowl. This then results in a beautiful, semicircular shape for your bowl.

3. Smooth everything with wet hands. You can smooth out cracks, transitions, and bumps with the dampened modelling stick or with a dampened finger. Now let your clay bowl dry on the bowl for at least 24 hours at room temperature.

4. When your bowl is done drying, carefully remove it from the bowl. Also check whether the inside of the bowl has dried, if not, put the bowl aside again and let it dry. You can easily sand off sharp edges or bumps with the dampened sanding sponge.

5. Now it's time to paint! Take acrylic paints of your choice and paint your bowl according to your ideas. Let the paint dry well.

Tip: You can easily mix the colours with each other and thus have an even larger choice of colours.

6. A few splashes of paint now look great. Mix any colour, such as black with a little water, and pick up the colour with a toothbrush. Put on a disposable glove. Now you stroke the bristles with your thumb so that splatters appear on your bowl. Let everything dry well.

7. Finally, paint your bowl with FIMO gloss varnish and let it dry well again. The varnish makes the bowl shine like glazed ceramic and protects against moisture and dirt.

If you feel like it, you are welcome to design additional bowls in different sizes and colours. Your creativity knows no limits!

MATERIAL

- FIMOair "white" 8100-0
- acrylic roller 8700 05
- FIMO modelling tool 8711
- blade set 8700 04
- FIMO gloss varnish 8703 01 BK
- FIMO sanding sponges (8700 08)
- Design Journey synthetic brush 989 SBK3-3
- Design Journey acrylic paints 8500 C24
- toothbrush
- backing paper
- 2 pencils (hexagon) as a spacer
- small bowl of water to moisten your fingers

- paper plate or base for acrylic paint
- disposable gloves
- round cookie cutters
- small bowl (about the same diameter as the cookie cutter)

FIMO® air – AIR-DRYING MODELLING CLAYS

Product information

- Air-drying modelling clays
- With natural substances
- Ideal for art, recreation and hobby as well as for educational purposes in schools, kindergartens and other similar facilities

FIMO® air

- Clay-like
- Ready to use
- Dimensionally stable, neutral smell
- Smooth consistency
- Foil packaging prevents the drying out of the modelling clay
- Hardened models can be modified (filed, sanded, drilled, painted, varnished)
- Contains at least 95 % natural substances

FIMO® air light:

- Extra light
- Ready to use
- Dimensionally stable, neutral smell
- Smooth consistency
- Foil packaging prevents the drying out of the modelling clay
- Hardened models can be modified (filed, sanded, drilled, painted, varnished)
