Noris® junior Modelling dough + Noris® jumbo Plasticine clay

FIMO® colour display	82–83
----------------------	-------

FIMO® Brand Shop	84–87
------------------	-------

With **FIMO® kids** (p. 13 ff.) easy modelling is guaranteed! It is **particularly smooth, easy to shape** and available in a wide variety of bright colours. This modelling clay lets the young artists run free with their imagination and create their own toys.

With **FIMO® soft** (p. 28 ff.) you can turn your ideas into reality. The modelling clay is ready to use and easy to blend – **ideal for beginners and hobby artists**. Easily workable, it has **30 brilliant colours** for you to work with!

FIMO® effect (p. 39 ff.) gives your artwork that certain something: your creation will **shine, shimmer and sparkle**. Available in a **variety of different shades and effects** like nightglow or glitter, this opens up a whole world of stunning options.

FIMO® liquid (p. 48 ff.) is an oven-hardening gel, suitable for **beginners as well as for more advanced users**. It has a thick and fluid consistency. After hardening, it is extremely flexible. FIMO liquid comes with a practical dosage tip for **pinpoint application and clean handling**. It is available in different colours like gold, silver, black and also in transparent. It is compatible with FIMO soft, FIMO effect, FIMO leather-effect and FIMO professional.

With **FIMO® leather-effect** (p. 51 ff.) you can create projects with a **leather-like look!** As the texture and colour palette of FIMO leather-effect are reminiscent of real leather. After hardening, the clay stays flexible and can be cut, sewn and embossed. **12 strong colours** invite to create and try out.

FIMO® professional (p. 58 ff.) is the clay for meeting the highest requirements of professionals, artists and advanced clay users. Its firm consistency allows **detailed** working and guarantees **dimensional stability**. Also included in the FIMO professional range are 6 natural skin tones which can be easily turned into pretty miniature faces. The colours can also be mixed with each other – giving FIMO professional finished faces a lifelike character with a silk matt porcelain shimmer.

FIMO® air (p. 67 ff.) is particularly easy to work with because it is not fired in an oven – **it air dries**.

Even after that, you can continue to process your creation by **sanding, drilling, filing, painting or polishing** it.

FIMO® tools (p. 56 ff.) help you take your creations to the next level: with these you can easily embellish your artworks, create **unique details** as well as original **patterns and designs**. We offer you modelling tools and acrylic rollers, moulds and varnishes as well as a large selection of decorative items.

Tips & Tricks

for working with FIMO® (oven-hardening)

Scan and discover

<http://www.staedtler.com/fimo-tutorial>

The right working surface

You can use a range of working surfaces for FIMO: **tiles**, **glass sheets** or **backing paper**. These surfaces ensure that no unwanted patterns are created on the FIMO as you work. They are also particularly easy to remove the modelling clay from.

Keeping hands and work surfaces clean

It is best to clean your hands and work surfaces with a **damp cloth**. This is gentle on the skin (particularly if you have been doing a lot of work with FIMO) and removes dust and dirt, to prevent them from being transferred to the modelling clay.

The best way to store FIMO®

If you have FIMO left over after crafting, it can be stored and **reused**. Oven-hardening FIMO must be stored in a **dust free** but **not airtight** environment. Storage should also protect against heat and sun. We recommend you store FIMO in a **cool, dry place** in **aluminum foil** or **plastic bags**, avoiding contact with polystyrene, PVC or styrofoam.

Creating accents with structured surfaces

Using **texture sheets** or **simple everyday objects** like a sponge, a lace doily or a leaf, great patterns can be created onto the modelled sheet. Just lay it on, press gently and carefully pull it off.

Marbling

By **twisting and kneading** different colours together, great marble effects can be created. The classic modern trend can be applied to FIMO models easily and create a very special look.

Mix colours

By **mixing FIMO colours together**, new and individual colours can be created. The FIMO blocks are divided into 8 portions, which makes the mixing of individual colours very easy.

Colour gradients

Colour gradients can also be made very easily by using different coloured FIMO clays. This effect gives the creations **depth and a special look**. Whether striking or subtle – the gradients can be designed individually.

Embellishing

With leaf metal, gloss or matt varnishes (p. 59 ff.) you can easily achieve stunning effects. After hardening your creation in the oven simply apply some size for leaf metal with a brush and carefully press the leaf metal onto the FIMO. Afterwards seal it with gloss varnish. Using **light and gloss effects** to create **shimmering accents** makes your FIMO creation an eye-catcher.

Made for little big talents!

>> Funny Beetles <<

For big and small: With the Funny Beetles anyone can shape their very own lucky charm! By counting the dots on the back, you can easily tell which species the bug belongs to. The most common one is the 7-dotted ladybug. How many dots does your ladybug have?

Find the full tutorial here:

www.fimo.com

[@fimostaedtler](https://www.instagram.com/fimostaedtler)

1. Cut off 4 portions from a block of FIMO kids „glitter red“ clay. Roll it into a ball for the body.

5. Shape a small nose and press it onto the head. Use a cocktail stick to make holes for eyes. Use a piece of drinking straw cut in half to make a mouth.

2. Shape 1½ portions of Black into a ball for the head.

3. Press the head onto the body, keeping both pieces rounded and even.

6. Roll tiny pieces of FIMO into balls for the spots. Flatten them slightly then press onto the body. Make 9 (or 7) spots.

Bake FIMO in a pre-heated oven at 110 °C for 30 minutes. Cool before handling.

4. Divide a ¼ portion into 2 pieces then shape into 2 cm antennae. Make 2 holes in the head with the end of a small brush. Press the antennae into the holes.

MATERIALS

- 1 block FIMO kids „glitter red“ 8030-212
- 1 block FIMO kids „black“ 8030-9
- A tile, modelling tools, cocktailstick, small paintbrush, wet wipes, ruler, scissors, straw

STAEDTLER®

Head of ideas.

Made for creative bloomers!

>>Upcycling DIY flower pot<<

1.

Roll half a block each of FIMO soft in "white", "pale pink" and "sahara" into long cords (approx. 30 cm long).

2.

Make your rainbow by shaping the white FIMO cord into a "U". Position the FIMO soft "sahara" cord underneath it, followed by the cord in "flesh light" and "white". Cut off the surplus ends at the bottom edges of the rainbow using the blade.

3.

Create several rainbows like this and place them directly on the terracotta pot. It also looks pretty if you add little dots of FIMO in between.

4.

Roll some FIMO soft "white" into a long cord. Cut off two pieces and form them each into a shallow "U" shape.

5.

Now add several smaller pieces of the FIMO cord and press down.

6.

Roll some FIMO soft "sahara" into a long cord. Print out the template and shade over the reverse side of the paper with a soft pencil.

7.

Now go over the lines with an HB pencil to transfer the design to your flower pot.

8.

Position the FIMO cords on the lines you have traced and press down. Now harden all your terracotta pots with FIMO decorations for 30 minutes in a preheated oven at 110 °C / 230 °F on upper and lower heat.

Tip: If the FIMO won't stick to the terracotta pot after hardening, simply attach your design using superglue.

>> Shell earrings in trend colours<<

Our new trend colours evoke the desire for summer, sun, and sea! We'll show you how to create beautiful jewellery pieces with lovely cutters and elegant earrings. The shell shape will soon dangle from your ears, enhancing your trip to the sea. Perhaps you can already hear the sound of the surf?

Find the full tutorial here:

 www.fimo.com  [@fimostaedtler](https://www.instagram.com/fimostaedtler)

FIMO® kids

FIMO® soft | effect | leather-effect

1. Roll out the half block of FIMO soft in the trend colour "ocean wave". Use spacers (approx. 3 mm) to achieve an evenly thick sheet. Take the cutter and press it into the FIMO. For some cutters, it might be helpful to dip them in cornstarch or powder beforehand to prevent sticking.

2. Many cutters have a cutting outer edge and embossing shapes inside, so it's important that the sheet is thick enough. Gently remove the shell shapes from the surrounding FIMO.

3. To mount the metal ear studs, use the pearl piercing needle to create holes.

4. You can add a textured surface to parts of your shell shapes. Press coarse-grained sandpaper gently onto the FIMO and lift it off.

5. Place all elements in the oven at 110 °C for 30 minutes. Let them cool afterward.

6. Bend the metal rings using pliers and thread the earrings and shell shapes onto the ring. Then close it again.

>> FIMO® effect botanical colours „loop earrings“<<

With the new FIMO botanical colours and its fine plant parts, you can create wonderfully natural-looking pieces of jewellery. Get started right away and in an hour you will have beautiful earrings dangling from your ears!

1.

Take half of the FIMO botanical half-block and roll it into a string. Then use the blade to divide it into three equal parts. Roll out the string further. To achieve an even thickness, stick spacer (e.g. wooden sticks) under a glass plate and use them to roll out the cords.

3.

You can place two ovenproof supports under the hangers to stabilise them. Place all the elements in the oven at 110 °C for 30 minutes. Leave them to cool down afterwards. To be able to connect your moulds to the earrings after hardening, you need to drill small holes in them with the hand drill

2.

Lay the three cords together and press them together evenly. You will need two pieces of 8 cm each for the earrings. Cut them off using the blades. Lay the two ends of the ribbon on top of each other to create a drop shape inside the loop. Let the ends protrude slightly and bend them backwards.

4.

Use pliers to blend the metal earrings open and push them through the hole. Then close them again. Your earrings will be particularly shiny if you coat them with gloss varnish. Allow the coat to dry thoroughly afterwards.

MATERIALS

- FIMO effect botanical colour of your choice
- FIMO blade set 8700 04
- FIMO gloss varnish 8703 01 BK
- FIMO oven thermometer 8700 22
- Earrings
- Spacer (e.g. wooden sticks)
- Glass plate
- Ruler
- Baking paper
- Pliers
- Hand drill

>> Flower earrings in FIMO® effect botanical <<

If spring is taking its time, we'll create our own little blossoms! With the new FIMO effect botanical colours and their fine plant parts, you can craft wonderfully natural-looking jewellery – whether in the Sunflower, Mallow, or Rose shade, FIMO effect botanical offers six natural tones. And when combined with an eyecatcher from FIMO effect metallic, you'll surely catch everyone's gaze. Enjoy the DIY!

Find the full tutorial here:

 www.fimo.com  [@fimostaedtler](https://www.instagram.com/fimostaedtler)

1. Start by rolling out the FIMO effect metallic orange with the acrylic roller. Place two wooden spatulas next to it to achieve an even sheet thickness. Next, cut out two small orange circles, which will later form the centers of your flowers.

4. To connect your shapes with the stud after hardening, use the pearl piercing needle to make small holes. Place all elements in the oven at 110 °C for 30 minutes.

2. Roll out the FIMO effect sunflower as well. Cut out a total of 10 small circles, which will serve as the flower petals. Place your thumb in the center of each circle and pull slightly at one point to create small droplet shapes. Place 5 droplet shapes in a ring on baking paper and press the edges together slightly.

5. After cooling, sand the edges of your small jewellery pieces with fine sandpaper. Your earrings will have a particularly glossy finish if you apply clear varnish. We only applied varnish to the coloured center. Allow the layer to dry thoroughly.

3. In the center of the flower, place a small ball made of a quarter-circle of FIMO botanical sunflower. Then cover it with an orange circle of FIMO effect metallic. Press it only at the edges, so the center of the flower slightly curves upward.

6. Open one of the jump rings with pliers and thread the flower onto it, then close it. Next, open another jump ring and thread the ear stud and the flower onto its ring. Ensure you thread them in the correct orientation. Close this jump ring as well.

FIMO® LIQUID UND FIMO® MIX QUICK

Product information

FIMO® Liquid

- Oven-hardening liquid gel
- Especially for beginners, hobby artists and professionals
- Thick, fluid consistency
- 4 different colours:
 - **Translucent** – especially clear and translucent
 - **Metallic gold and silver** – with shimmering pearlescent effect
 - **Black** – well covering colour brilliance
- Extremely flexible after hardening
- Ideal complement for FIMO modelling clay: compatible with FIMO soft, FIMO effect, FIMO leather-effect and FIMO professional

- Practical dosage tip for pinpoint application and clean handling
- Can be used in bakeable silicone moulds
- Resealable plastic bottle
- To embellish FIMO clays as well as a bond of hardened with non-hardened FIMO items
- Ideal for contouring and grouting techniques
- Image transfer from prints, graphite and pencil drawings
- Glaze effects: pure or dyed with FIMO modelling clay
- Mixing techniques: e.g. marbling and colour gradients
- Detailed instruction can be scanned via QR code

Mix quick:

- Clay softener
- Extra soft material for kneading into firm FIMO
- For an easier and faster softening of firm FIMO

STAEDTLER®

Head of ideas.

Made for detail geeks.

>>Necklace made of FIMO® and leaf metal<<

Small beads that impress by combining fresh, trendy colours and exquisite leaf gold metal. The larger beads are even more stunning: not only do they wow with colourful surface patterns – you can even see the leaf gold metals sparkling through from the inside.

Find the full tutorial here:

 www.fimo.com  [@fimostaedtler](https://www.instagram.com/fimostaedtler)

1.

Cut half a block of each the violet and the turquoise FIMO professional into four strips. Then divide these into four small, three medium-sized and three large pieces, as pictured. Roll these into balls. Flatten the smallest four balls of each colour.

2.

Carefully tear off small bits of the leaf gold metal and place on as many balls as you like. Using a knitting needle carefully make a hole into each bead. Harden them in the oven at 110 °C for 30 min. After cooling, varnish the beads with the gloss to prevent the leaf gold from rubbing off.

3.

Mix two strips of the transparent FIMO professional with a sheet of gold leaf. Knead together until fully intermixed. With the acrylic roller flatten the mixture, until it is approx. 1/2 mm thick. Then use it to wrap around the medium-sized beads: The thinner the gold mixture is, the more impressive the depth effect will be.

4.

Diagonally cut the violet and white FIMO professional in half. Join two halves each to create one two-coloured block. Using the roller roll out this block, fold in half (placing violet on violet, white on white) and repeat until you have a smooth transition of colours.

5.

Roll up the flattened sheet, beginning with the light-coloured end. The darker colour will be on the outside.

6.

Cut the cane in half and add a strip of white FIMO professional. Repeat this process twice until your cane has a pattern with an eight-pointed star.

Find out how to create even more beads on the FIMO website!

STAEDTLER®

Head of ideas.

Air-drying modelling clays
no bake. **JUST MAKE.**

Tips & Tricks

for working with FIMO®air (air-drying)

[www.staedtler.com/
FIMOair](http://www.staedtler.com/FIMOair)

Scan and discover

The right working surface

A wide variety of surfaces are suitable as a working surface. These include **tiles, smooth wooden boards, silicone mats or baking paper**. However, you should not work with FIMOair on glass surfaces – the modelling clay can stick to them.

The right tools

For the FIMOair project to be a complete success, the right basic equipment is essential: **a rolling pin for rolling out, sponges, brushes, modelling tools, a blade or knife** and a small **bowl** of water are essential.

Drying

The time it takes for the FIMOair to harden depends on the **wall thickness, size, room temperature and humidity** and can take several days. If possible, the work of art should dry slowly at **cooler temperatures** – this ensures greater resistance to cracking and deformation. It is important not to use a hairdryer, as models can deform or crack. To ensure that the modelled object dries evenly, it should be turned over during the drying process.

The optimal storage of FIMO®air

Small leftovers can be stored in an **airtight container such as a screw-top jar** with a few drops of water. The same applies to packages that have already been opened - these should also be stored in an airtight container at **room temperature** and conditioned with **a few drops of water** - especially if the mixture is to be stored for a longer period of time. If the FIMOair leftovers are no longer needed, they can simply be disposed of with residual waste.

Creating accents with structured surfaces

Using **texture sheets or simple everyday objects** like a sponge, a lace doily or a leaf, great patterns can be created onto the modelled sheet. Just lay it on, press gently and carefully pull it off.

Embellishing

With leaf metal, gloss or matt varnishes you can easily achieve stunning effects. After hardening your creation in the oven simply apply some size for leaf metal with a brush and carefully press the leaf metal onto the FIMOair. Afterwards seal it with gloss varnish. Using **light and gloss effects** to create **shimmering accents** makes your FIMOair creation an eye-catcher.

CLAYLIKE

You enjoy modelling with clay, but the effort is too much for you?
FIMOair with its clay-like texture is perfect for producing all kinds of objects

SAND

The edges of your creation are a little bit humpy?
Then just sand them and make them soft and smooth.

SAW

You need to adapt your creation?
That's okay. You can use a saw for modelling clay for example to remove unwanted parts.

AIR-DRYING

No bake – just make. Is it really that easy?
Yes! No kiln or oven is needed for producing all kinds of objects – it dries in the air!

CARVE, DRILL, FILE

You want to hang up your project?
No problem – just drill some holes.

PAINT & VARNISH

Just white is not exciting enough?
Grab some acrylic paints or even permanent marker and add to your pieces your own personal touch.

Not shiny enough?
No need to worry – put some varnish on top and your project will shine and shimmer.

>>DIY bowl made of air-drying FIMO®air<<

These self-made bowls made of FIMOair are perfect for all small items such as jewellery, cosmetics, keys or paper clips.

With that the chaos and searching has finally come to an end!

Find the full tutorial here:

 www.fimo.com  [@fimostaedtler](https://www.instagram.com/fimostaedtler)

Level crafting time

easy

ca. 20 min

1. Roll out a block of FIMOair in white with the acrylic roller to form an approx. 6mm thick sheet on a piece of baking paper. Take a round cookie cutter with the size of your choice (e.g. 10cm) and cut out the basic shape of your bowl.

Tip: In order to achieve an even thickness, you can put a pencil next to the mass to be rolled out and roll over it with the acrylic roller. These „spacers“ ensure that your plate is evenly thick.

2. Place the cut-out circle on your porcelain or glass bowl, press it gently so that it hugs the bowl. This then results in a beautiful, semicircular shape for your bowl.

3. Smooth everything with wet hands. You can smooth out cracks, transitions, and bumps with the dampened modelling stick or with a dampened finger. Now let your clay bowl dry on the bowl for at least 24 hours at room temperature.

4. When your bowl is done drying, carefully remove it from the bowl. Also check whether the inside of the bowl has dried, if not, put the bowl aside again and let it dry. You can easily sand off sharp edges or bumps with the dampened sanding sponge.

5. Now it's time to paint! Take acrylic paints of your choice and paint your bowl according to your ideas. Let the paint dry well.

Tip: You can easily mix the colours with each other and thus have an even larger choice of colours.

6. A few splashes of paint now look great. Mix any colour, such as black with a little water, and pick up the colour with a toothbrush. Put on a disposable glove. Now you stroke the bristles with your thumb so that splatters appear on your bowl. Let everything dry well.

7. Finally, paint your bowl with FIMO gloss varnish and let it dry well again. The varnish makes the bowl shine like glazed ceramic and protects against moisture and dirt.

If you feel like it, you are welcome to design additional bowls in different sizes and colours. Your creativity knows no limits!

MATERIAL

- FIMOair "white" 8100
- acrylic roller 8700 05
- FIMO modelling tool 8711
- blade set 8700 04
- FIMO gloss varnish 8703 01 BK
- FIMO sanding sponges (8700 08)

- Design Journey synthetic brush 989 SBK3-3
- Design Journey acrylic paints 8500 C24
- toothbrush
- backing paper
- 2 pencils (hexagon) as a spacer
- small bowl of water to moisten your fingers

- paper plate or base for acrylic paint
- disposable gloves
- round cookie cutters
- small bowl (about the same diameter as the cookie cutter)

FIMO®air – AIR-DRYING MODELLING CLAYS

Product information

- Air-drying modelling clays
- With natural substances
- Ideal for art, recreation and hobby as well as for educational purposes in schools, kindergartens and other similar facilities

FIMO®air

- Clay-like
- Ready to use
- Dimensionally stable, neutral smell
- Smooth consistency
- Foil packaging prevents the drying out of the modelling clay

- Hardened models can be modified (filed, sanded, drilled, painted, varnished)
- Contains at least 95 % natural substances

FIMO®air light:

- Extra light
- Ready to use
- Dimensionally stable, neutral smell
- Smooth consistency
- Foil packaging prevents the drying out of the modelling clay

- Hardened models can be modified (filed, sanded, drilled, painted, varnished)
- Contains at least 84 % natural substances

FIMO®air wood-effect:

- Wood-like
- Ready to use
- Dimensionally stable, neutral smell
- Smooth consistency
- Foil packaging prevents the drying out of the modelling clay

- Hardened models can be modified (filed, sanded, drilled, painted, varnished)
- Contains at least 95 % natural substances

FIMO®air granite-effect:

- Granite-like touch & feel
- Ready to use
- Dimensionally stable, neutral smell
- Smooth consistency
- Foil packaging prevents the drying out of the modelling clay

- Hardened models can be modified (filed, sanded, drilled, painted, varnished)
- Contains at least 85 % natural substances
