No such thing as grey and drab. Even in pencil, a national park is alive. That's because the level of detail in pencil drawings can be surprisingly realistic, be it as a stand-alone piece of art, a draft sketch, a prep-sketch for watercolour painting, or as a precise accent in an

image. STAEDTLER provides the perfect tool for each one of these techniques. Pencils with a high carbon content, water-soluble or permanent, in medium or hard degrees, metallic glossy or for drawing on unusual materials.

Coloured pencils

A delicate dragonfly resting by the water? Draw its eyes exactly with the tip of the pencil, use the side of the pencil to shade, cross-hatch or smudge the sky and the water. Use bright colours or sophisticated shading. Coloured pencils are perfect for illustrations or as a mixed-medium with watercolours. This makes STAEDTLER coloured pencils especially

attractive for new artists. Their fine colour abrasion makes it possible to draw exact lines even with little practice. And with our water-soluble watercolour pencils, your customers can make even large surfaces come to life, thanks to high-quality colour pigments and impressive colour brilliance.
