With **FIMO® kids** (p. 16 ff.) easy modelling is guaranteed! It is **particularly smooth, easy to shape** and available in a wide variety of bright colours. This modelling clay lets the young artists run free with their imagination and create their own toys.

With **FIMO® soft** (p. 34 ff.) you can turn your ideas into reality. The modelling clay is ready to use and easy to blend – **ideal for beginners and hobby artists**. Easily workable, it has **24 brilliant colours** for you to work with!

FIMO® effect (p. 42 ff.) gives your artwork that certain something: your creation will **shine, shimmer and sparkle**. Available in a **variety of different shades and effects** like nightglow or gemstone, this opens up a whole world of stunning options.

FIMO® liquid (p. 45) is an oven-hardening gel, suitable for **beginners as well as for more advanced users**. It has a thick and fluid consistency. After hardening, it is extremely flexible. FIMO liquid comes with a practical dosage tip for **pinpoint application and clean handling**. It is available in different colours like gold, silver, black and also in transparent. It is compatible with FIMO soft, FIMO effect, FIMO leather-effect and FIMO professional.

With **FIMO® leather-effect** (p. 46 ff.) you can create projects with a **leather-like look!** As the texture and colour palette of FIMO leather-effect are reminiscent of real leather. After hardening, the clay stays flexible and can be cut, sewn and embossed. **12 strong colours** invite to create and try out.

FIMO® tools (p. 54 ff.) help you take your creations to the next level: with these you can easily embellish your artworks, create **unique details** as well as original **patterns and designs**. We offer you modelling tools and acrylic rollers, moulds and varnishes as well as a large selection of creative items.

FIMO®air (p. 80 ff.) is particularly easy to work with because it is not fired in an oven – **it air dries**. Even after that, you can continue to process your creation by **sanding, drilling, filing, painting or polishing** it.

FIMO® professional (p. 70 ff.) is the clay for meeting the highest requirements of professionals, artists and advanced clay users. Its firm consistency allows **detailed** working and guarantees **dimensional stability**.

FIMO® professional doll art (p. 74 f.) is specifically suitable for **filigree doll and sculpture modelling** – thanks to its very high dimensional stability. The modelling clay is ideal for adding parts and smoothing over joints. Due to the special formula with excellent opacity, **6 natural skin tones** can be used to create enchanting miniature faces. The colours can be mixed perfectly to give the modelled faces lifelike character with **semimatt porcelain finish**.

Tips & Tricks

for working with FIMO® (oven-hardening)

The right working surface

You can use a range of working surfaces for FIMO: **tiles, glass sheets** or **backing paper**. These surfaces ensure that no unwanted patterns are created on the FIMO as you work. They are also particularly easy to remove the modelling clay from.

Keeping hands and work surfaces clean

It is best to clean your hands and work surfaces with a **damp cloth**. This is gentle on the skin (particularly if you have been doing a lot of work with FIMO) and removes dust and dirt, to prevent them from being transferred to the modelling clay.

The best way to store FIMO®

If you have FIMO left over after crafting, it can be stored and **reused**. Oven-hardening FIMO must be stored in a **dust free** but **not airtight** environment. Storage should also protect against heat and sun. We recommend you store FIMO in a **cool, dry place** in **aluminium foil** or **plastic bags**, avoiding contact with polystyrene, PVC or styrofoam.

Creating accents with structured surfaces

Using **texture sheets or simple everyday objects** like a sponge, a lace doily or a leaf, great patterns can be created onto the modelled sheet. Just lay it on, press gently and carefully pull it off.

Marbling

By **twisting and kneading** different colours together, great marble effects can be created. The classic modern trend can be applied to FIMO models easily and create a very special look.

Mix colours

By **mixing FIMO colours together**, new and individual colours can be created. The FIMO blocks are divided into 8 portions, which makes the mixing of individual colours very easy.

Colour gradients

Colour gradients can also be made very easily by using different coloured FIMO clays. This effect gives the creations **depth and a special look**. Whether striking or subtle – the gradients can be designed individually.

Embellishing

With leaf metal, gloss or matt varnishes you can easily achieve stunning effects. After hardening your creation in the oven simply apply some size for leaf metal with a brush and carefully press the leaf metal onto the FIMO. Afterwards seal it with gloss varnish. Using **light and gloss effects** to create **shimmering accents** makes your FIMO creation an eye-catcher.

Made for little big talents!

>> Funny Beetles <<

For big and small: With the Funny Beetles anyone can shape their very own lucky charm! Counting the dots on the back one can easily recognize to which sort the bug belongs to. The most common one is the 7-dotted ladybug. How many dots does your ladybug have?

Find the full tutorial here:

 www.fimo.com

 [@fimostaedtler](https://www.instagram.com/fimostaedtler)

1. Cut off 4 portions from a block of Glitter Red FIMO kids clay. Roll it into a ball for the body.

5. Shape a small nose and press it onto the head. Use a cocktail stick to make holes for eyes. Use a piece of drinking straw cut in half to make a mouth.

2. Shape one and a half portions of Black into a ball for the head.

3. Press the head onto the body, keeping both pieces rounded and even.

4. Divide a ¼ portion into 2 pieces then shape into 2 cm antennae. Make 2 holes in the head with the end of a small brush. Press the antennae into the holes.

6. Roll tiny pieces of FIMO into balls for the spots. Flatten them slightly then press onto the body. Make 9 (or 7) spots.

Bake FIMO in a pre-heated oven at 110 °C for 30 minutes. Cool before handling.

Made for creative bloomers!

>>Upcycling DIY flower pot<<

1.

Roll half a block each of FIMO soft in "white", "pale pink" and "sahara" into long cords (approx. 30 cm long).

2.

Make your rainbow by shaping the white FIMO cord into a "U". Position the FIMO soft "sahara" cord underneath it, followed by the cord in "flesh light" and "white". Cut off the surplus ends at the bottom edges of the rainbow using the blade.

3.

Create several rainbows like this and place them directly on the terracotta pot. It also looks pretty if you add little dots of FIMO in between.

4.

Roll some FIMO soft white into a long cord. Cut off two pieces and form them each into a shallow "U" shape.

5.

Now add several smaller pieces of the FIMO cord and press down.

6.

Roll some FIMO soft sahara into a long cord. Print out the template and shade over the reverse side of the paper with a soft pencil.

7.

Now go over the lines with an HB pencil to transfer the design to your flower pot.

8.

Position the FIMO cords on the lines you have traced and press down. Now harden all your terracotta pots with FIMO decorations for 30 minutes in a preheated oven at 110 °C / 230 °F on upper and lower heat.

Tip: If the FIMO won't stick to the terracotta pot after hardening, simply attach your design using superglue.

MATERIALS

1. Cut half a block of each the violet and the turquoise FIMO professional into four strips. Then divide these into four small, three medium-sized and three large pieces, as pictured. Roll these into balls. Flatten the smallest four balls of each colour.

2. Carefully tear off small bits of the leaf gold metal and place on as many balls as you like. Using a knitting needle carefully make a hole into each bead. Harden them in the oven at 110 °C for 30 min. After cooling, varnish the beads with the gloss to prevent the leaf gold from rubbing off.

3. Mix two strips of the transparent FIMO professional with a sheet of gold leaf. Knead together until fully intermixed. With the acrylic roller flatten the mixture, until it is approx. 1/2 mm thick. Then use it to wrap around the medium-sized beads: The thinner the gold mixture is, the more impressive the depth effect will be.

4. Diagonally cut the violet and white FIMO professional in half. Join two halves each to create one two-coloured block. Using the roller roll out this block, fold in half (placing violet on violet, white on white) and repeat until you have a smooth transition of colours.

5. Roll up the flattened sheet, beginning with the light-coloured end. The darker colour will be on the outside.

6. Cut the cane in half and add a strip of white FIMO professional. Repeat this process twice until your cane has a pattern with an eight-pointed star.

Find out how to create even more beads on the FIMO website!

FIMO® PROFESSIONAL – THE CLAY FOR THE HIGHEST OF DEMANDS

FIMO® professional

STANDARD BLOCK 8004-..

85 g, 55 x 55 x 24 mm,
segmented into 8 portions,
24 brilliant colours,
min. order quantity: 4

Product information

- Oven-hardening modelling clay
- Especially for professionals, artists and advanced users
- Firm consistency for particularly filigree items
- 24 brilliant colours, incl. 5 True Colour colours
- Practical division into 8 portions for easy blending
- Compatible with FIMO soft, FIMO effect, FIMO leather-effect and FIMO professional doll art
- Easy to open
- Consistent high level of quality for meeting the highest of demands
- Infinitely versatile: for jewellery, accessories and home deco items

Colour packs:

- 2 different sets
- True Colours with the purest of pigments (with colour mixing system – for exact and brilliant blending results)
- Basic Colours

Mix quick:

- Clay softener
- Extra soft material for kneading into firm FIMO
- For an easier and faster softening of firm FIMO

Colour display:

- Comprising 6 feed trays
- 1 compartment for presentation of brochures, flyers or give-aways
- Showcase for presenting finished sample "peacock"
- Intelligent, modular snap-in design
- 24 FIMO professional colours
- Display inlay
- 1 Colour label

MODELLING TOOLS

Product information

- High-quality tools
- Designed to satisfy the needs of artists and advanced users
- For the creation of e.g. original pendants and brooches

Cutters:

- High-quality, multiple-sized metal shaped cutters
- Three different sizes per motif in each set: 4 cm, 5 cm, 6 cm
- Two different geometrical shapes: diamond and pennant

- Sharp-edged cutting side for precise results
- Rounded top edge to prevent injury
- Seams riveted on outside to ensure perfect contours
- Ideal for creating jewellery
- Easy to clean

FIMO® professional

CUTTER 'DIAMOND' 8724 04 PB

3 different sizes,
min. order quantity: 1

FIMO® professional

CUTTER 'PENNANT' 8724 06 PB

3 different sizes,
min. order quantity: 1

Each shape comes
in 3 different sizes!

Clay scraper set:

- High-class design
- 2 flexible scrapers (tooth scraper, smooth scraper)
- Made of stainless steel
- Ideal for embossing and scoring patterns
- For shaping, smoothing, measuring (cm / inch scale), and portioning
- Facilitates the removal from smooth surfaces
- Easy to clean

FIMO® professional

**CLAY SCRAPER SET
8700 15**

Content: 2 extra flexible scrapers
(tooth scraper, smooth scraper),
dimensions:
tooth scraper 128 x 54 mm,
smooth scraper 130 x 65 mm,
min. order quantity: 5

FIMC^{air}®

Air-drying modelling clays
no bake. **JUST MAKE.**

>>DIY bowl made of air-drying FIMOair<<

These self-made bowls made of FIMOair are perfect for all small items such as jewellery, cosmetics, keys or paper clips.

With that the chaos and searching has finally come to an end!

Difficulty level:

easy

Time required:

ca. 20 min

Find the full tutorial here:

www.fimo.com [@fimostaedtler](https://www.instagram.com/fimostaedtler)

1. Roll out a block of FIMOair in white with the acrylic roller to form an approx. 6mm thick sheet on a piece of baking paper. Take a round cookie cutter with the size of your choice (e.g. 10cm) and cut out the basic shape of your bowl.

Tip: In order to achieve an even thickness, you can put a pencil next to the mass to be rolled out and roll over it with the acrylic roller. These „spacers“ ensure that your plate is evenly thick.

2. Place the cut-out circle on your porcelain or glass bowl, press it gently so that it hugs the bowl. This then results in a beautiful, semicircular shape for your bowl.

3. Smooth everything with wet hands. You can smooth out cracks, transitions, and bumps with the dampened modeling stick or with a dampened finger. Now let your clay bowl dry on the bowl for at least 24 hours at room temperature.

4. When your bowl is done drying, carefully remove it from the bowl. Also check whether the inside of the bowl has dried, if not, put the bowl aside again and let it dry. You can easily sand off sharp edges or bumps with the dampened sanding sponge.

5. Now it's time to paint! Take acrylic paints of your choice and paint your bowl according to your ideas. Let the paint dry well.

Tip: You can easily mix the colours with each other and thus have an even larger choice of colours.

6. A few splashes of paint now look great. Mix any colour, such as black with a little water, and pick up the colour with a toothbrush. Put on a disposable glove. Now you stroke the bristles with your thumb so that splatters appear on your bowl. Let everything dry well.

7. Finally, paint your bowl with FIMO gloss varnish and let it dry well again. The varnish makes the bowl shine like glazed ceramic and protects against moisture and dirt.

If you feel like it, you are welcome to design additional bowls in different sizes and colours. Your creativity knows no limits!

MATERIAL OVERVIEW

- FIMOair "white" 8100
- acrylic roller 8700 05
- FIMO modelling tool 8711
- blade set 8700 04
- FIMO gloss varnish 8703 01 BK
- FIMO sanding sponges (8700 08)
- Design Journey synthetic brush 989 SBK3-3
- Design Journey acrylic paints 8500 C24
- toothbrush
- backing paper
- 2 pencils (hexagon) as a spacer
- small bowl of water to moisten your fingers

- paper plate or base for acrylic paint
- disposable gloves
- round cookie cutters
- small bowl (about the same diameter as the cookie cutter)

FIMO®air – AIR-DRYING MODELLING CLAYS

Product information

- Air-drying modelling clays
- With natural substances
- Ideal for art, recreation and hobby as well as for educational purposes in schools, kindergartens and other similar facilities

FIMO®air:

- Clay-like
- Ready to use
- Dimensionally stable, neutral smell
- Smooth consistency
- Foil packaging prevents the drying out of the modelling clay
- Hardened models can be modified (filed, sanded, drilled, painted, varnished)
- Contains at least 95% natural substances

FIMO®air light:

- Extra light
- Ready to use
- Dimensionally stable, neutral smell
- Smooth consistency
- Foil packaging prevents the drying out of the modelling clay
- Hardened models can be modified (filed, sanded, drilled, painted, varnished)
- Contains at least 84% natural substances

FIMO®air wood-effect:

- Wood-like
- Ready to use
- Dimensionally stable, neutral smell
- Smooth consistency
- Foil packaging prevents the drying out of the modelling clay
- Hardened models can be modified (filed, sanded, drilled, painted, varnished)
- Contains at least 95% natural substances

FIMO®air granite-effect:

- Granite-like touch & feel
- Ready to use
- Dimensionally stable, neutral smell
- Smooth consistency
- Foil packaging prevents the drying out of the modelling clay
- Hardened models can be modified (filed, sanded, drilled, painted, varnished)
- Contains at least 85% natural substances
